

## **MPH Custom Homes Inc.**

In March 2006, we commissioned MPH Custom Homes Inc to build a home for us in Spring Hill, Florida.

We were extremely wary, having had a very bad experience with the construction of a previous home, resulting in two years of worry and frustration until it finally completed. Even then, several items required extensive attention

MPH completed our home in less than six months and was occupied in September 2007. They initiated the job, project managed every aspect without a single, serious problem. Any alterations were carried out in time and what few minor glitches occurred were attended to immediately. The Local Authority regulations were met and handled by MPH at every phase.

We are hugely pleased with completed article, the finish and build quality are excellent. There have been very few punch-outs and these have been tended to without any dispute.

As we were never able to be on site during construction, you can take our recommendation as endorsing MPH's ability to do the job unsupervised and to a standard well above the average.

We strongly commend them to any prospective client. We will be happy to answer any emails from such.
